

RE: Service Line Identification

Dear Customer,

P.W.S.D #1 is required by the EPA/Missouri DNR to verify the water service line going into your home or business. More information can be found on our website at <https://pwsd1jeffco.com/lcrr-service-line-inventory>.

More information about EPA and DNR requiring this information can be found at the websites provided below.

www.dnr.mo.gov/document-search/do-you-have-lead-service-line-pub3046/pub3046

www.dnr.mo.gov/document-search/how-identify-your-water-service-line-material-pub3052

Although we do not believe there are any lead lines in our system, we are required to send this notification to all service addresses with unknown service line material. We have not identified any lead in our system, but it is important for all consumers to read the health effects information provided below and follow the recommendations for reducing lead in your drinking water. The Health Effects of Lead can be found on this link: www.dnr.mo.gov/document-search/lead-drinking-water-important-information-how-protect-your-health-pub2409/pub2409

How to Reduce Lead in Drinking Water and other information, testing methods and steps to take to minimize exposure is at: www.epa.gov/safewater/lead

If you have not already done so, please click [HERE](#) to fill out our customer survey as soon as possible. You can also email a picture of your service line to slim@pwsd1jeffco.org (be sure to include your service address in the subject line). For further questions or to request help identifying your service line material, call 636-296-0659 or email customerservice@pwsd1jeffco.org. The lead service line inventory is a huge undertaking for our water system and your help is greatly appreciated. Please include your address in the subject line for any pictures you email.

If you have already sent in your picture/survey, you do not have to send it again!

The Department of Natural Resources may have low interest loan and grant funding if you choose to replace galvanized or lead lines on the customer side of the meter and in your home. It is called the Infrastructure, Investment and Jobs Act, better known as the Bipartisan Infrastructure Law.

Thank you,

Erin DeVore
Executive Director
Public Water Supply District No.1 of Jefferson County, MO
